Join a progressive, employee-focused, regional multidiscipline engineering firm offering sought-after benefits: Highly competitive salaries, including paid overtime for hourly employees or comp time for salaried employees, Medical/Dental/Vision/Life Insurance-including company paid coverage for domestic partner, generous PTO, 401K, and CEU opportunities, in-house training sessions, paid professional membership, company activities and events, casual and family-oriented work environment, and more. With 14 offices in 8 western states, Horrocks Engineers has seen a four-year average growth of 32%. Horrocks Engineers provides our employees with the opportunity to **Learn More, Do More, and Earn More.**

Horrocks Engineers is seeking a highly motivated, young engineer to support our structural staff on highway projects in the West region while working from our Phoenix, AZ office. The Engineer must have a strong technical background and the desire to work on large, multi-discipline civil and transportation projects.

### Responsibilities:

- Perform or check bridge designs using CSiBridge, Conspan, RC Pier, BRASS, MDX and/or other bridge software
- Design or check retaining wall and other structural components in support of roadway or site civil projects
- Prepare structure type selection studies
- Evaluate bridge/structure location conditions, prepare final designs, including quantity take-offs, cost estimates, and specifications for highway bridges and structures
- Experience and desire to work with our team to pursue and win projects for the firm
- Assist the local team to establish and maintain client relationships; ability to coordinate and communicate with clients to ensure project design objectives are met and achieve client satisfaction
- Assist in building a strong regional presence for the firm in transportation related structural engineering

### Requirements:

- B.S. or M.S. degree in Civil Engineering
- E.I.T. required, P.E. a plus
- 3 or more years of experience in bridge design
- Willingness to work on projects locally or in workshare with other offices
- Experience leading bridge design teams a plus
- Design Build and Alternative Delivery experience a plus
- Demonstrated experience primarily focused on site civil and transportation related projects
- Possess a proven history of meeting project deadlines and budgets
- Experience with Microstation and/or AutoCAD with InRoads or Civil 3D a plus
- Excellent verbal and written communication skills with clients, staff, and management

If you are interested in challenging ways to expand and broaden your engineering experience, come join our team of engineering professionals.
